

FewClix Unity from GBS is a plug-in for IBM (Lotus) Notes that is seamlessly integrated into the Notes email client and transforms the everyday email experience for users. It enables users to perform their daily email tasks faster and more effectively than before. Through its unified search and prioritization capabilities, it allows users to do more with their email in less time, saving them up to 30 minutes EVERY DAY.

This document provides a head-to-head comparison of the Search and Prioritization capabilities of the new IBM Notes 9 email client and FewClix Unity.
